# Valuation of machinery and business assets

We are major providers of services in this specialised area and are able to carry out valuations of plant, machinery, equipment, motor vehicles, stock and a variety of intangible assets for many purposes which include:

- Mergers, acquisitions, disposals, MBO's, MBI's, funding and sale and lease back transactions.
- Flotation on the stock exchange, secondary markets and international listings.
- Chattel mortgage and security funding.
- Lease funding forecasts.
- Revaluations for balance sheet purposes to accounting standards.
- Verification and consolidation of fixed asset records.
- Preparation of asset registers.
- Identification of qualifying assets for capital allowances.

Our clients include leading banks, multi-national organisations financial institutions, corporate finance professionals, large public companies, small private firms, government departments, and public authorities.

We operate throughout the UK and abroad.

The range of industries for which we have provided specialist advice on machinery and business assets is extensive. The wealth of expertise and trade specialisation acquired in providing services across many industry sectors enables us to provide valuation advice to newly emerging industries.
